PROJECTS HANDLED

1. MyEquifax

Organization : UST Global

Client : Equifax

Skill Detail : Spring Boot, Angular 8, SQL, Bootstrap, Html 5, Protractor, Jasmine/Karma unit testing etc

Role : Software Developer

Duration : 2020 January to Present.

Project Summary : Equifax is an American multinational credit reporting agency. MyEquifax web application is mainly used to manage security freeze, fraud alert and disputes, and access free credit reports and MyEquifax products. Among all these our team handles fraud alert modules.

Responsibilities :

- Implementing Business logic
- Front end design and development in Angular 8.
- Front end unit testing using Jasmine/Karma, end-to-end testing using protractor, and writing automation test using cucumber using gherkins language
- Being part of daily standup calls and Weekly Grooming calls.
- Understanding the requirements and Coding with respect to wireframes discussions from grooming call.

2. Agile Metrics Dashboard

Organization : UST Global

Client : Internal Project

Skill Detail : Spring Boot, Angular 7, Chart Js, ECharts, Mongo DB, Bootstrap, Html 5 etc.

Role : Software Developer

Duration : 2019 January to 2019 December.

Project Summary : To create a platform to visualize Agile metrics at an Enterprise level. Most of the tools like JIRA, TFS or Trello mainly focus on a particular project's standpoint. The goal is to have a common dashboard at a portfolio level which will

showcase the reports at different levels of abstraction (Account, Business Unit, Project level).

Responsibilities:

- Worked extensively in Agile development process.
- Responsible for frontend optimization and performance techniques.
- Responsible for frontend as well as backend development.
- Experienced in writing backend unit test cases (JUnit).
- Responsible for different business meetings with clients and daily reporting to the project manager.

3. Equifax Motor Insurance Bureau

Organization : UST Global

Client : Equifax

Skill Detail : JAVA/J2EE, Spring Boot, REST, Angular 5.

Role : Software Developer

Duration : 2018 June to December 2018.

Responsibilities :

- Implementing Business logic
- Front end design and development in Angular 6 using PRIME NG components with unit testing in Karma/Jasmine
- Being part of daily standup calls and Weekly Grooming calls.
- Understanding the requirements and Coding with respect to wireframes discussions from grooming call.

4. Cherrystay

Organization : Cherrystay Services Pvt Ltd.

Skill Detail : Spring Boot, Angular JS, REST, JHipster, Git, H2 DB etc.

Role : Software Engineer

Duration : 2017 June to 2018 May.

Project Summary: Cherrystay is a web application like TP Bazaar. It helps us to find places nearby Trivandrum for better home stay/PG/House for rent facility. This application uses various web technologies like Spring MVC, Rest, Angular JS, Html, and uses AWS for deploying the application in cloud, JHipster for developing the wireframe of the application.

Responsibilities:

- Worked extensively in agile development process.
- Responsible for frontend optimization.
- Bug Fixing

5. Office Administrative System

Technologies Used: Java, JSP, Servlet, MySQL, NetBeans IDE, Tomcat.

6. Admission Portal

Technologies Used: Swing, JDBC, MySQL, NetBeans IDE.

SKILLS

- Good understanding of object oriented concepts.
- Experience in developing web application using JSP, Servlet, MySQL database.
- Hands on experience in designing web pages for the web applications using html, css, bootstrap, angular js and other web technologies.
- Able to create all the documents needed for a project.
